ESTEEMED SPEAKERS

Session -1

**CONCERNS IN
EVALUATION
SYSTEM OF HIGHER
MEDICAL EDUCATION**

Prof. Subhash Chandra Parija
Hon'ble Vice Chancellor
Sri Balaji Vidyapeeth, Puducherry

Session -2

**OBJECTIVE STRUCTURED
CLINICAL EXAMINATION (OSCE)
AS A TOOL OF
"ASSESSMENT - AS - LEARNING"
IN HIGHER MEDICAL EDUCATION**

Prof. K. R. Sethuraman,
Former Vice Chancellor, SBV
Dean, Faculty of Medicine,
AIMST University, Malaysia

Session - 3

**ADVANCES IN
EVALUATION OF
HIGHER MEDICAL EDUCATION**

Prof. Arun Jamkar,
Former Vice Chancellor,
Maharashtra University of Health Sciences, Nashik
Chair, National Bioethics Curriculum Implementation,
UNESCO Chair in Bioethics, Haifa

Moderated by

Prof. M. Ravishankar
Director, E Learning,
SBV, Puducherry

*Advances In Evaluation
in Higher Medical Education*

21st October 2020 :300 pm

Prof Arun Jamkar

President AHPE

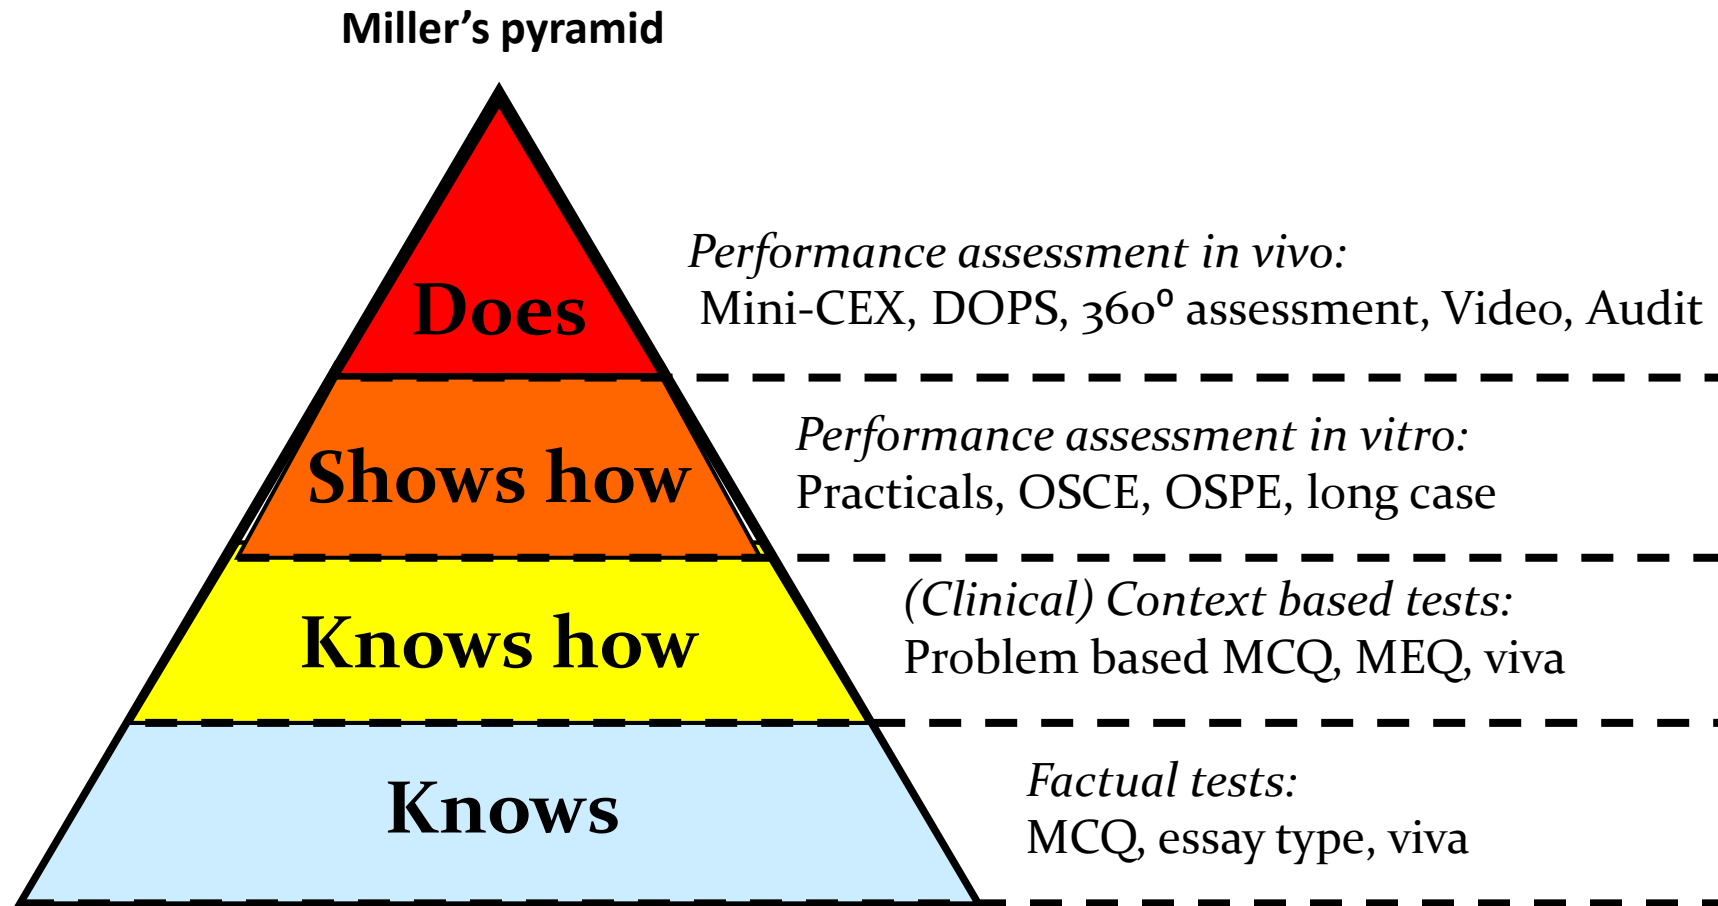

and

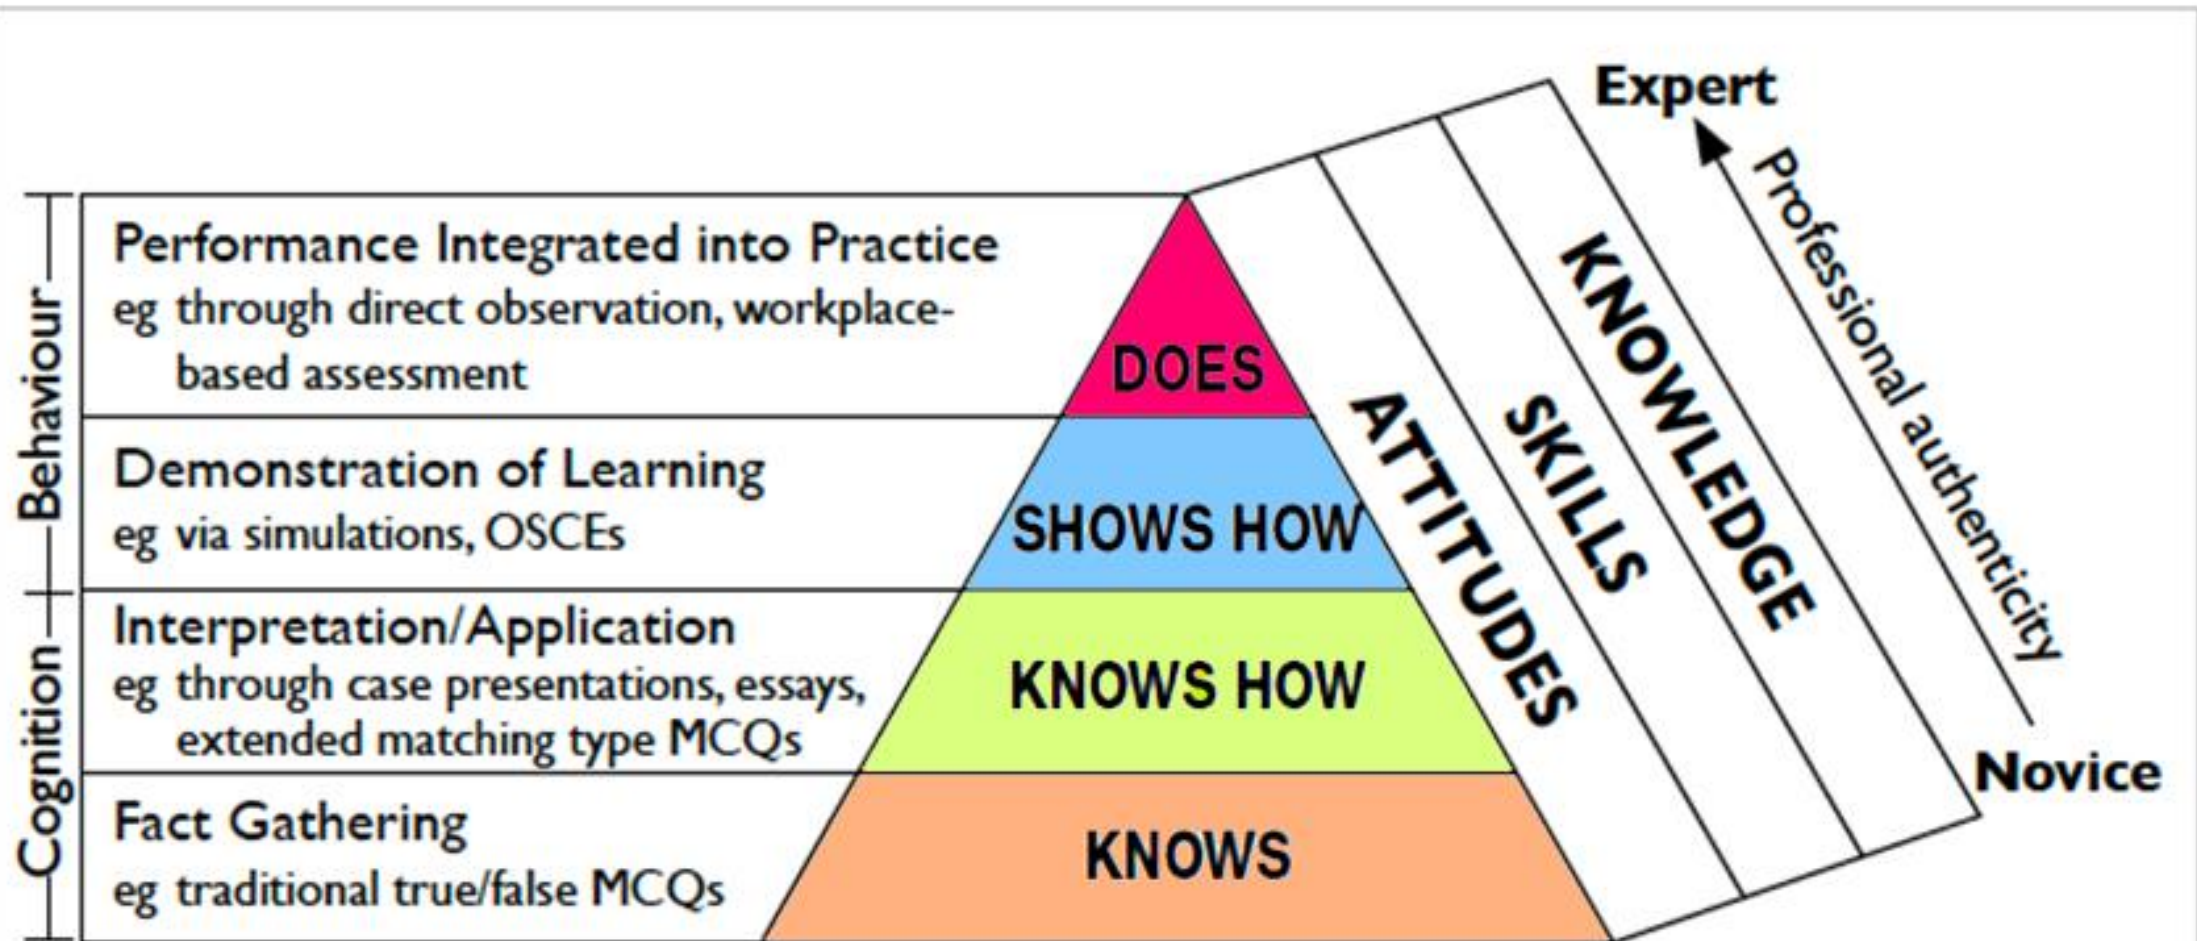

Ex Vice-Chancellor of

Maharashtra University of Health Sciences

- **Prof Dr Arun Jamkar,**
M.S. Ph D (Surgical Oncology), FICS, FIAGES, FMAS, FAIMER
fellow
- Ex Vice Chancellor, Maharashtra university of Health sciences, Nashik
- Consultant , Persistent Systems Ltd, Pune
- Distinguished Professor, Symbiosis International University Pune
- Director, Post graduate programme, Research and Development, MIT
group of Medical Colleges Pune
- Ex Dean, B J Medical College Pune and RCSM Govt Medical
College Kolhapur

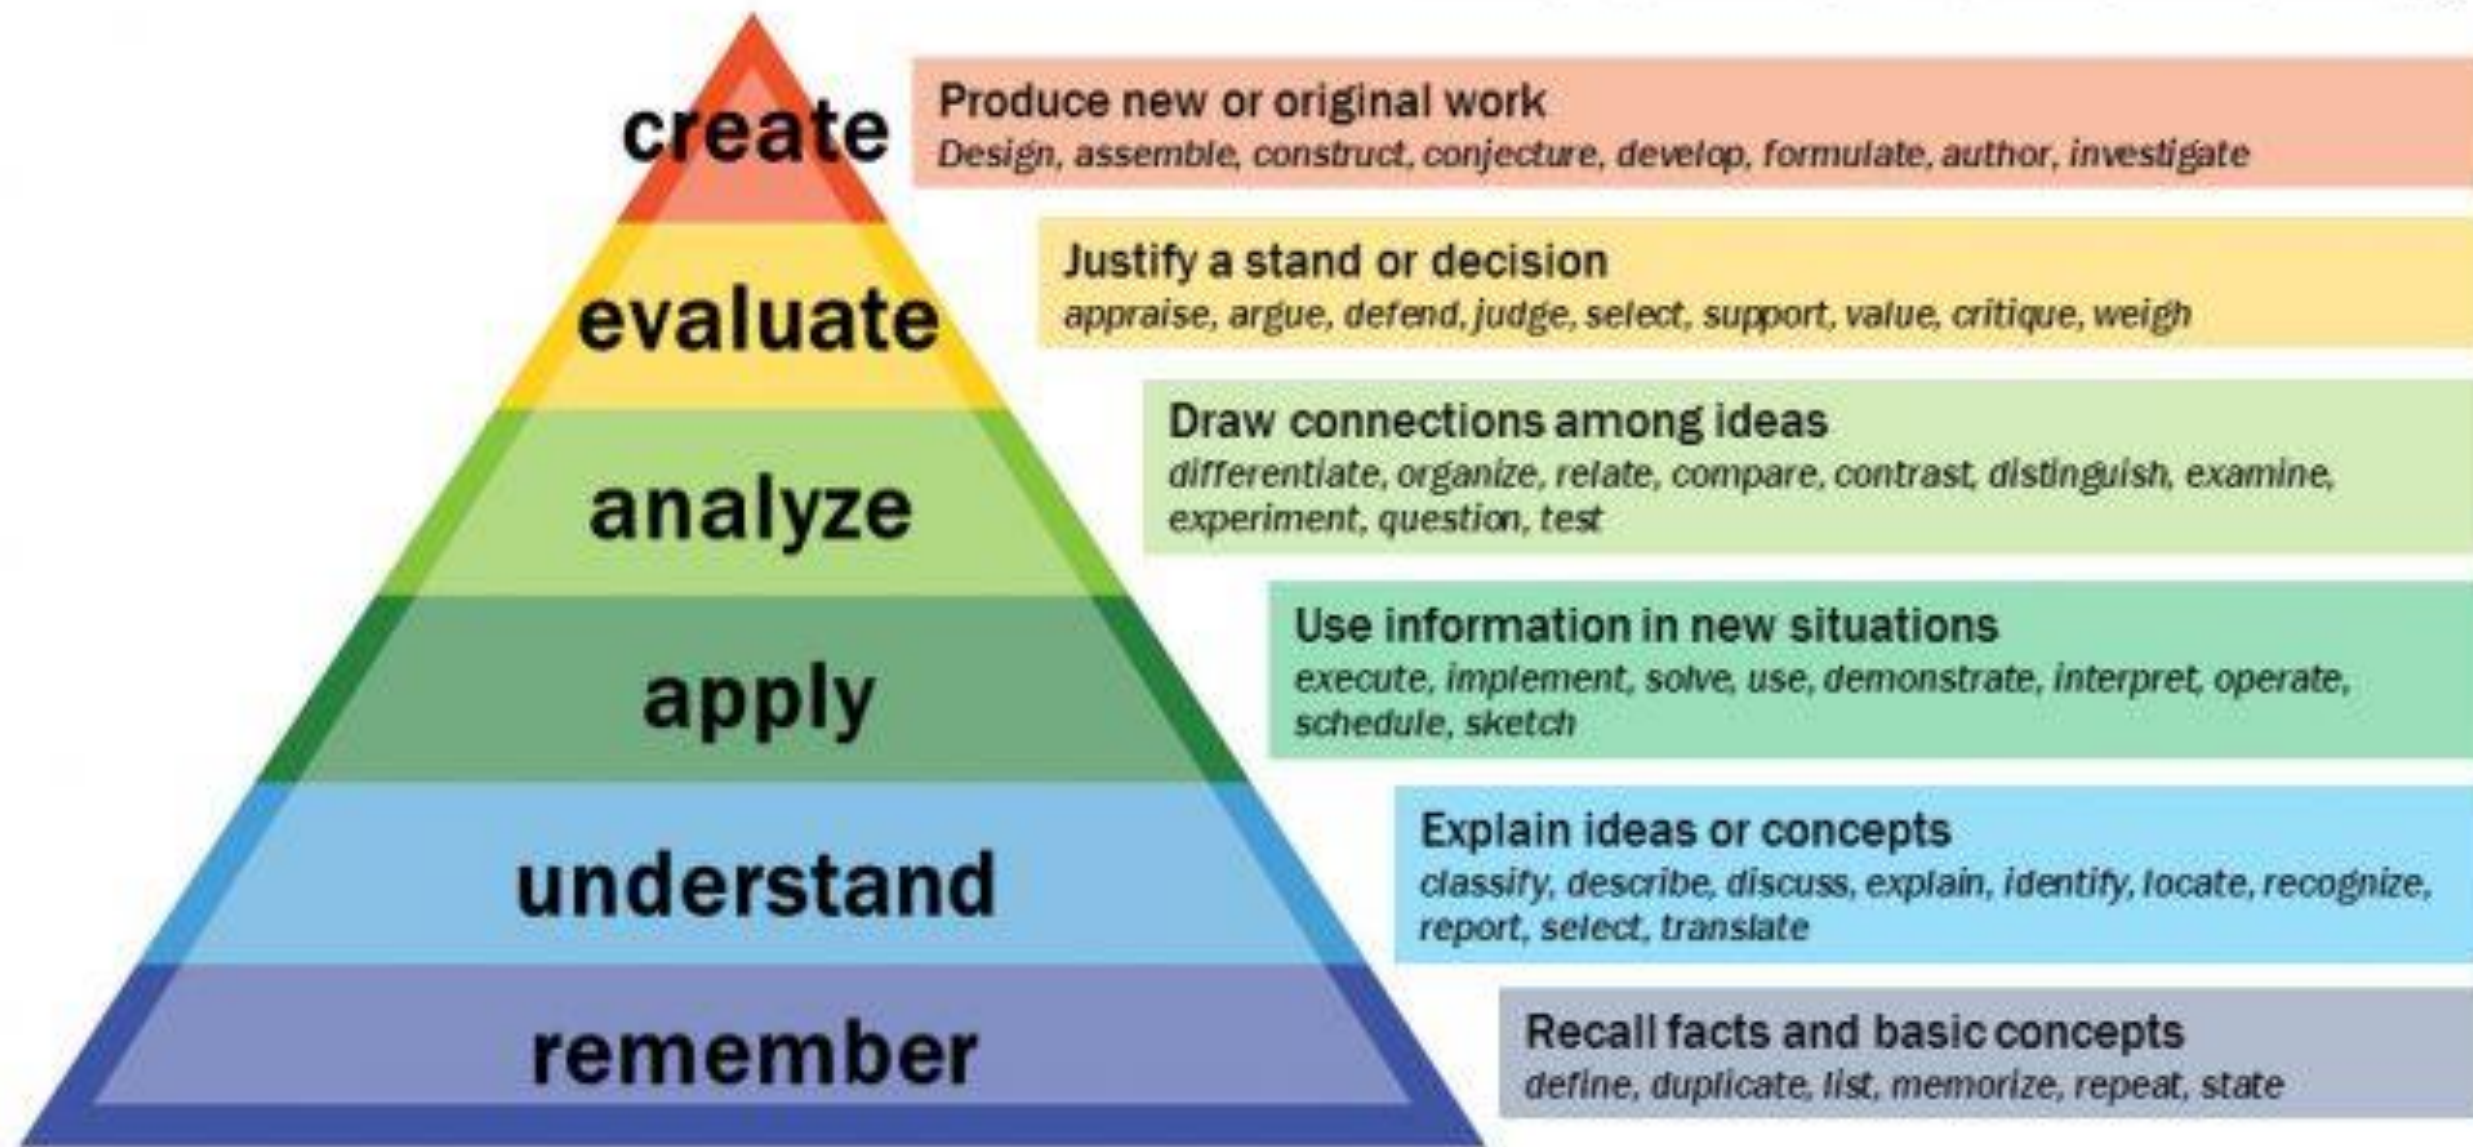

Differing levels for different levels of learners

Miller's pyramid for assessing clinical competence

Bloom's Taxonomy

Combining parts to make a new whole

Create

Judging the value of information or ideas

Evaluate

Breaking down information into component parts

Analyze

Applying the facts, rules, concepts, and ideas

Apply

Understanding what the facts mean

Understand

Recognizing and recalling facts

Remember

BLOOM'S REVISED TAXONOMY

Higher-order thinking

Creating

*Generating new ideas, products, or ways of viewing things
Designing, constructing, planning, producing, inventing.*

Evaluating

*Justifying a decision or course of action
Checking, hypothesising, critiquing, experimenting, judging*

Analysing

*Breaking information into parts to explore understandings and relationships
Comparing, organising, deconstructing, interrogating, finding*

Applying

*Using information in another familiar situation
Implementing, carrying out, using, executing*

Understanding

*Explaining ideas or concepts
Interpreting, summarising, paraphrasing, classifying, explaining*

Remembering

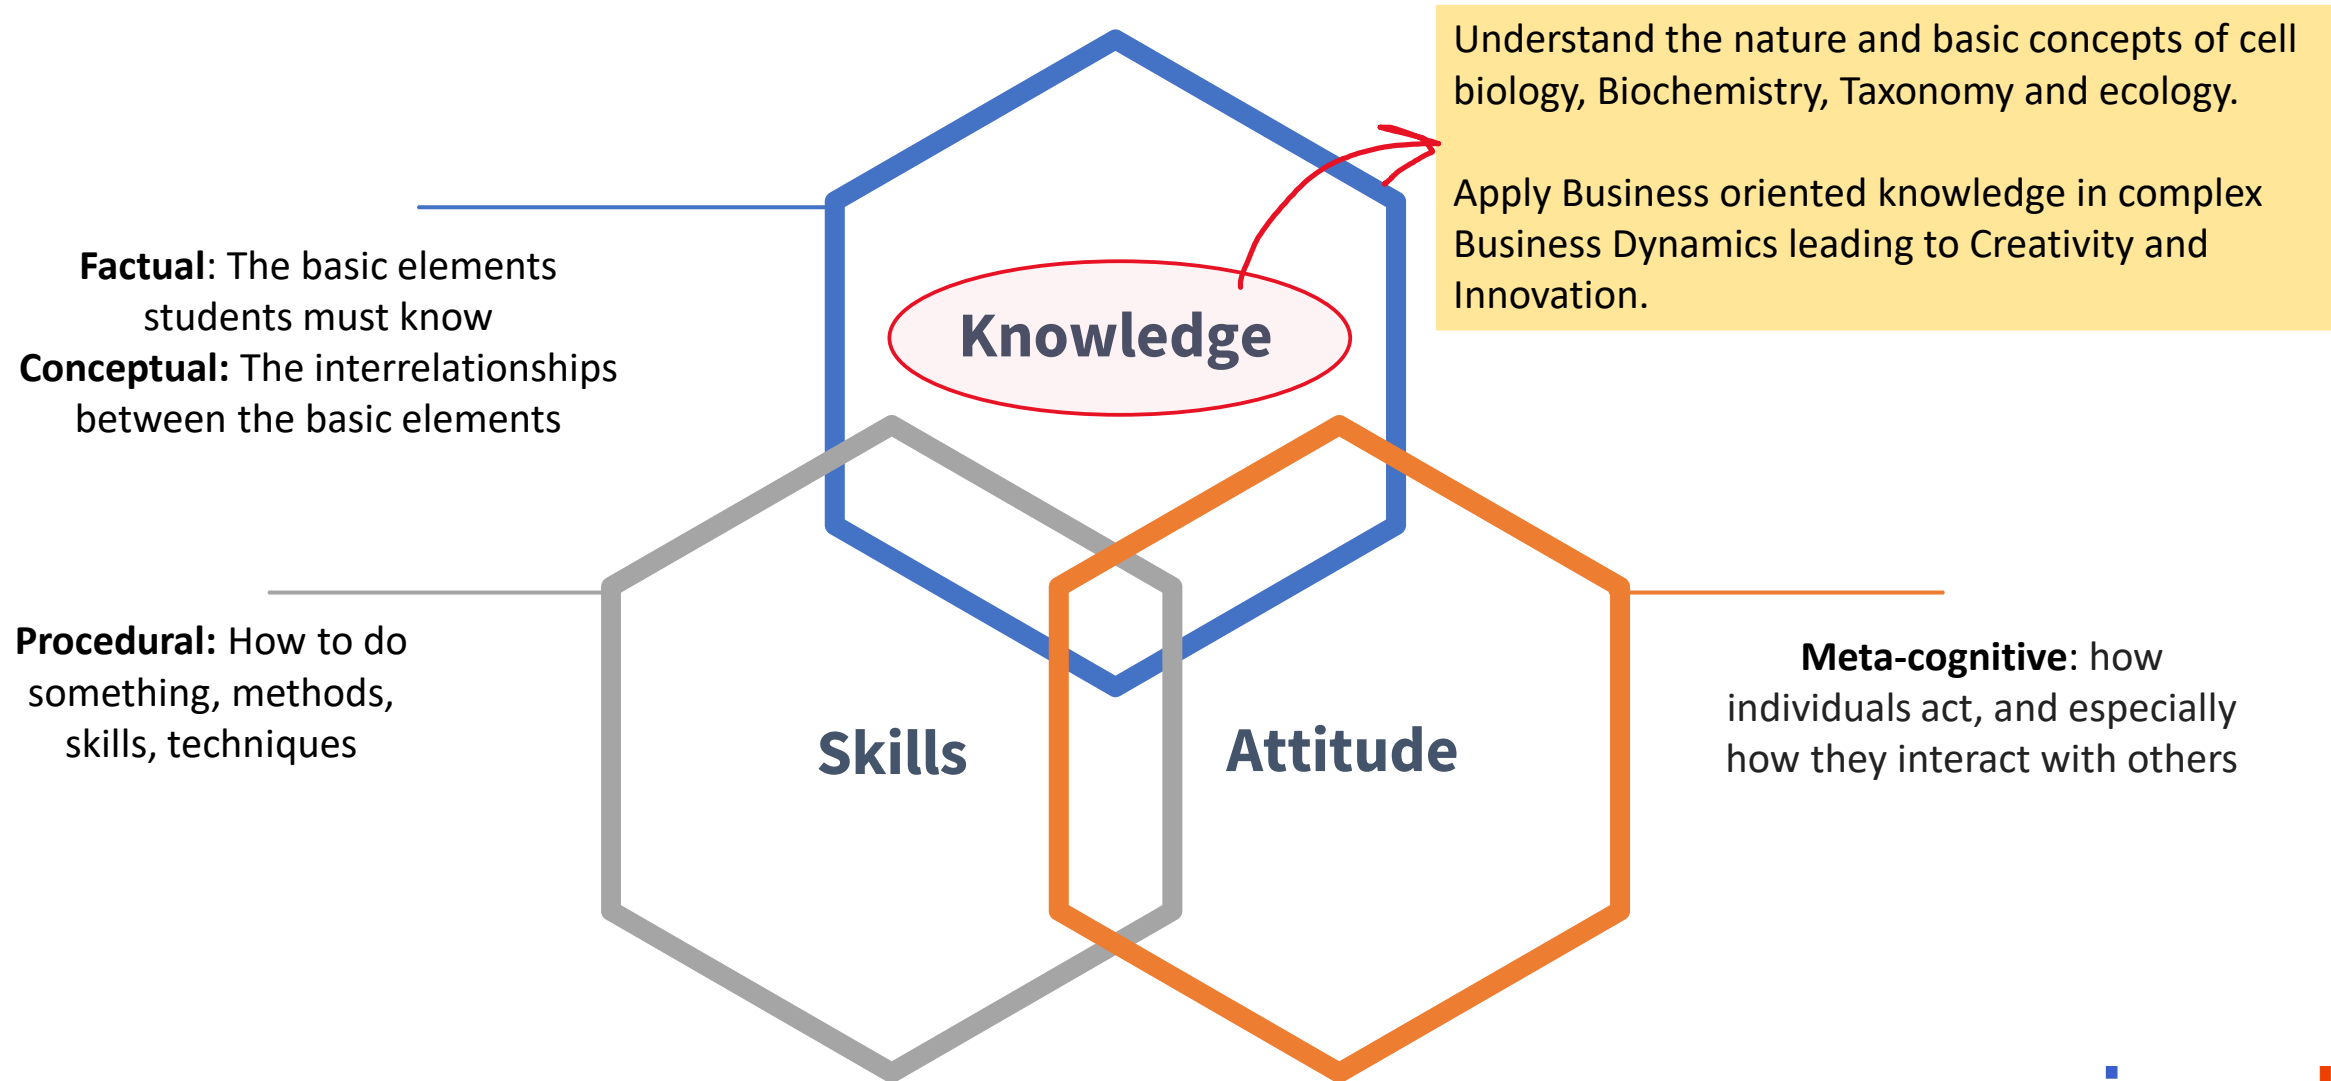

*Recalling information
Recognising, listing, describing, retrieving, naming, finding*

Augmented Intelligence
leading to
Artificial wisdom

Artificial Intelligence (AI) As Defined By John Mccarthy In 1955

The term AI, is defined as a machine with intelligent behaviour such as perception, reasoning, learning, or communication and the ability to perform human tasks

- **Artificial wisdom** is a software system that can demonstrate one or more qualities of being wise.
- **Artificial wisdom** can be described as **artificial** intelligence reaching the top-level of decision-making when confronted with the most complex challenging situations.

AI systems in Resource Management

- Applications and Challenges of Implementing Artificial Intelligence in Medical Education: Integrative Review
- Kai Siang Chan^{1*}; Nabil Zary^{1,2*}, PhD
- <http://mededu.jmir.org/2019/1/e13930/>

Results:

- A total of 37 articles were identified. Three primary uses of AI in medical education were identified: learning support (n=32), assessment of students' learning (n=4), and curriculum review (n=1).
- The main reasons for use of AI are its ability to provide feedback and a guided learning pathway and to decrease costs. Subgroup analysis revealed that medical undergraduates are the primary target audience for AI use.
- In addition, 34 articles described the challenges of AI implementation in medical education;
- Two main reasons were identified: difficulty in assessing the effectiveness of AI in medical education and technical challenges while developing AI applications.

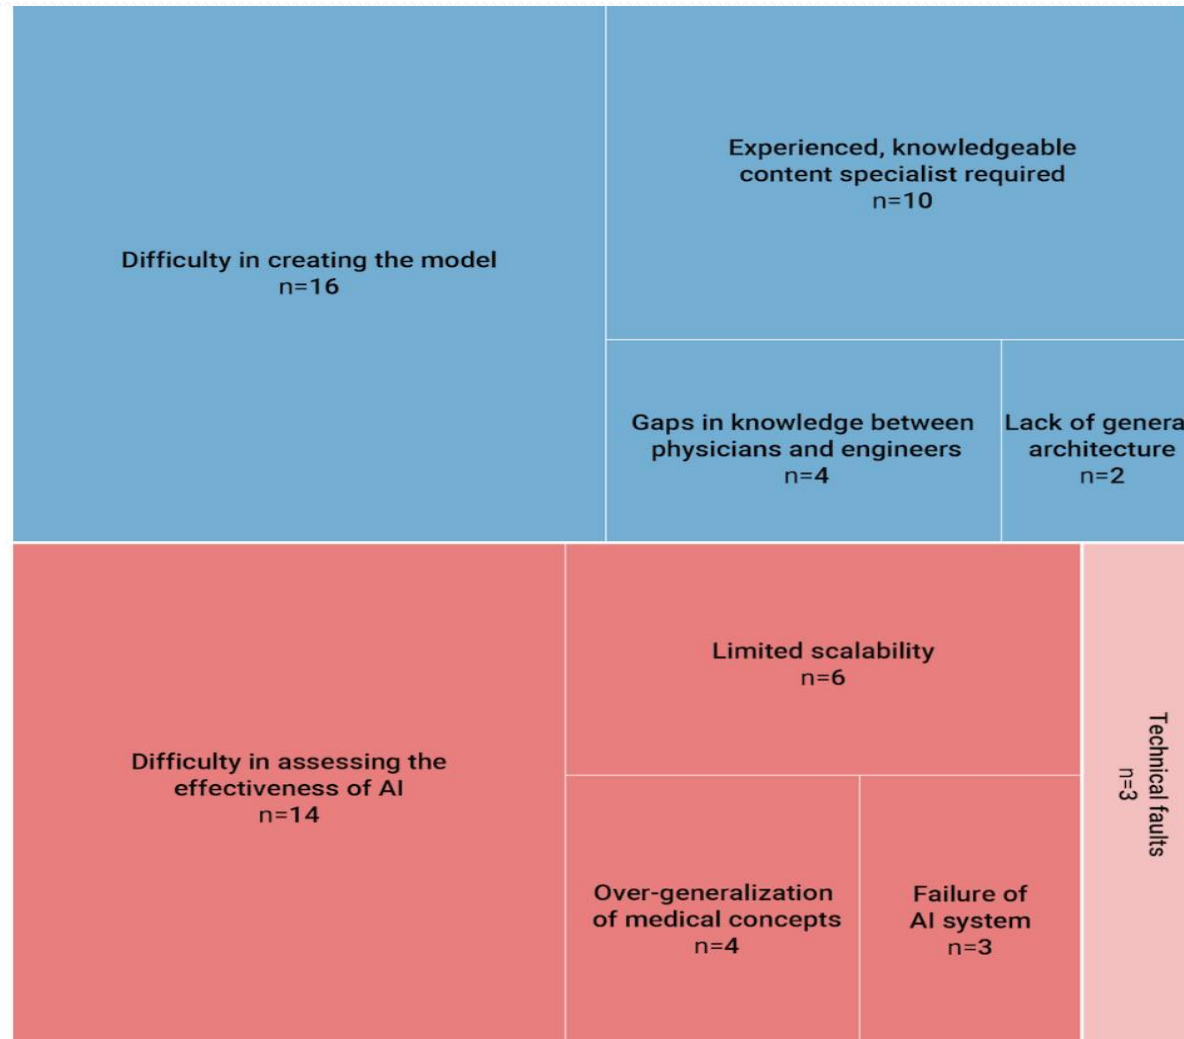

Overview of the current uses of artificial intelligence in medical education identified from review of 37 full text articles.

Focus and advantages of use	Total number of articles
Comprehensive analysis of the curriculum	1
Learning	
Feedback for learning	21
Evaluation of the learning process with guided learning pathway	18
Decreased costs	8
No harm to patients	6
Less teacher supervision required	3
Assessment	
Quicker assessment	4
Objective assessment	3
Feedback on assessment	2
Decreased costs	1

Total publications and sum of times cited by year in the last two decades. Retrieved from Web of Science for artificial intelligence in medical education, dated April 1, 2019

Hierarchical Presentation Of The Challenges Of Implementation Of Artificial Intelligence (AI) In Medical Education. The Upper Blue Rectangle Shows The Proportion Of Articles In Each Challenge Category In The Technical Aspects Of AI. The Lower Red Rectangle Shows The Proportion Of Articles For Challenges Relating To Perceived Usefulness (In Red) And Perceived Ease Of Use (In Light Red).

Kai Siang Chan¹;
 Nabil Zary
JMIR Med Educ
 2019;5(1):e13930
 doi: 10.2196/13930

Conclusions:

- The primary use of AI in medical education was for learning support mainly due to its ability to provide individualized feedback. Little emphasis was placed on curriculum review and assessment of students' learning due to the lack of digitalization and sensitive nature of examinations, respectively.
- Big data manipulation also warrants the need to ensure data integrity.
- Methodological improvements are required to increase AI adoption by addressing the technical difficulties of creating an AI application and using novel methods to assess the effectiveness of AI.
- To better integrate AI into the medical profession, measures should be taken to introduce AI into the medical school curriculum for medical professionals to better understand AI algorithms and maximize its use.

AI Techniques Can Be Implemented At 3 Levels Of Medical Education:

Tushar Garg, Medical Student quoting Noorbakhsh-Sabet

- Curriculum development and analysis, learning, and assessment.
- In curriculum assessment,
 - the use of AI helps to decrease the time needed to evaluate multiple curriculums,
 - solve multidimensional problems, provide greater classification accuracy, and establish a relationship between different variables.
- AI can be used to check the effectiveness of the curriculum and overall satisfaction of the medical students with the program, as this is important in training future doctors.
- In the learning process,
 - AI can help to provide students with adaptive and personalized educational content, which is further improved with student feedback and this, therefore, allows students to identify knowledge gaps and respond to them effectively
- Assessment of learning with the help of AI can help make the process of evaluation
 - more objective, fast, cost-efficient, and
 - provide extensive individualized feedback.

AI systems in Resource Management

Aim Of AI system in Assessment

- To create a question paper based on designated Assessment parameters from a validated Question bank
- Multiple question papers need to be created based on Difficulty index and differentiation index
- Graded question paper, Progressive Difficult questions
- To follow routine procedure of Setting up a question paper
- Each exam center can have a different set of question paper so that problem of leakage to be addressed
- To use advanced methods like scenario based question / Real time patient scenario
- Question bank should have all types of assessment methods to suitably address desired competency

Creating Rubric for Assessments

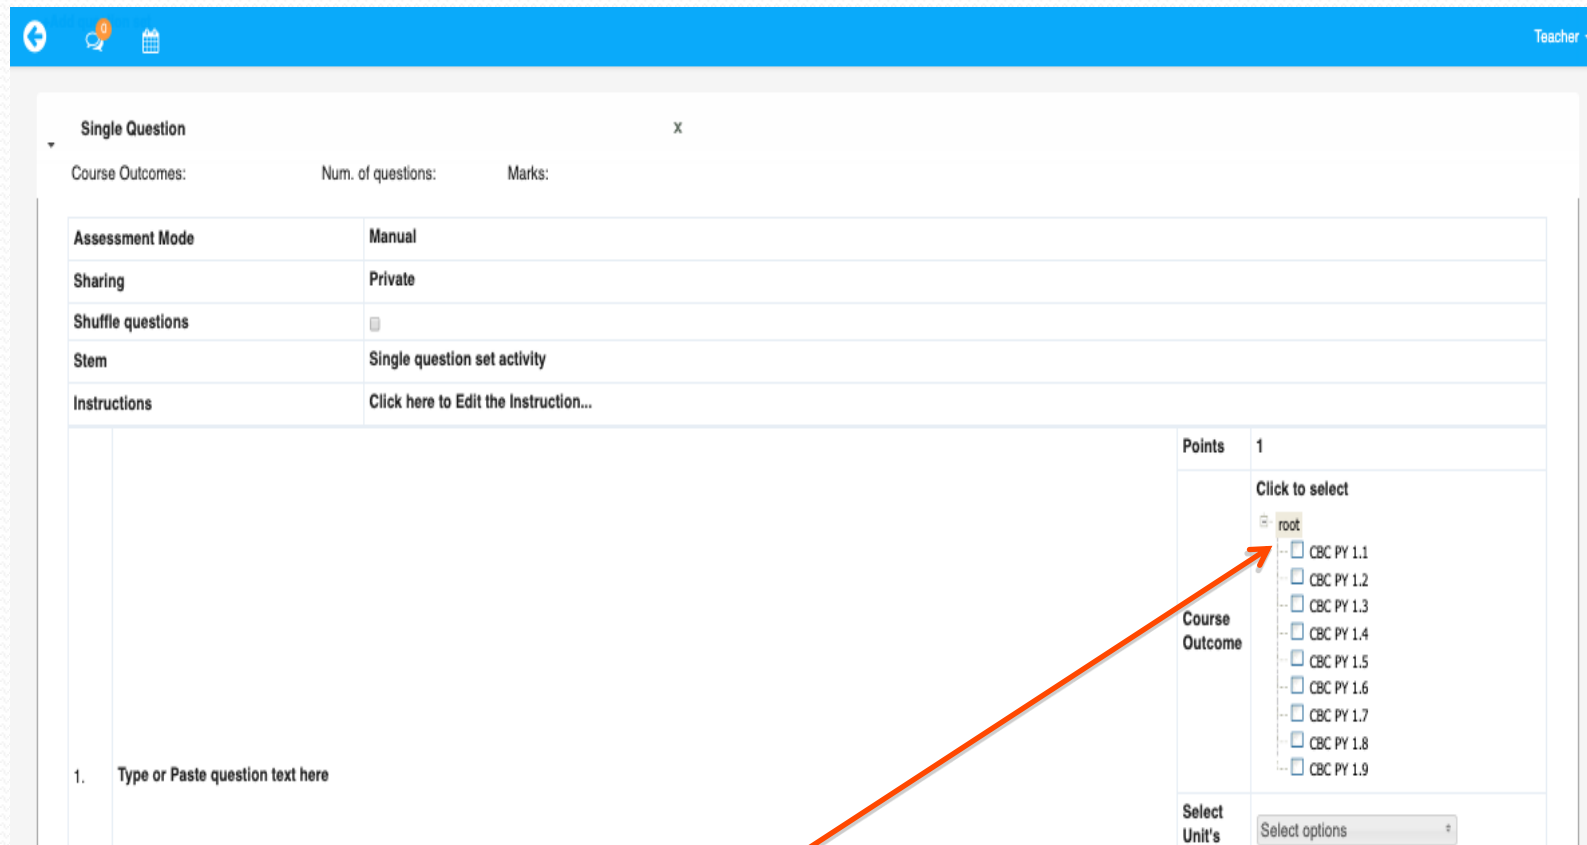

Title	Hydraulic Mechanics Rubric					
Description	Description					
Criteria	Criteria	Weightage (%)	Exceeds Expectation 92 - 100 %	Meets Expectation 72 - 91 %	Below Expectation 48 - 71 %	Below Expectation 0 - 47 %
			Lower Range:91	Lower Range:72	Lower Range:48	Lower Range:0
	Writing Journal	40	Completed with Neat diagrams, observations and correct answers of post lab questions and conclusion	Fairly completed with neat diagrams, observations and correct answers of post lab questions and conclusions	Either of diagram / post lab questions is incomplete Completed after guidance from the Professor	Partially incomplete write-ups
	Performance in lab	40	Designs and simulates independently with clear concepts	Designs and simulates independently but after trial and error	Designs and simulates with help of Professor	Not able to design and simulate even after help
	Viva	20	All the concepts regarding the experiment are clear	All the concepts regarding the experiment are partially clear	All the concepts regarding the experiment are not clear	Very bad fundamental knowledge.

Difficulty index and differentiation index can be used in addition

Calculation of Difficulty index and
differentiation index of

designing New Question paper using
AI systems

Mapping Questions to Competencies

The screenshot shows a user interface for editing a question. At the top, there is a blue header with navigation icons and a 'Teacher' dropdown. Below the header, the question is titled 'Single Question'. A table provides settings for the question, including Assessment Mode (Manual), Sharing (Private), Shuffle questions (unchecked), Stem (Single question set activity), and Instructions (Click here to Edit the Instruction...). To the right of the main table, there is a 'Points' field set to 1 and a 'Click to select' dropdown menu. This menu is open, showing a tree view of 'Course Outcome' options: root, CBC PY 1.1, CBC PY 1.2, CBC PY 1.3, CBC PY 1.4, CBC PY 1.5, CBC PY 1.6, CBC PY 1.7, CBC PY 1.8, and CBC PY 1.9. An orange arrow points from the 'Click to select' dropdown to a text box at the bottom of the page. The text box contains the text 'System allows you to map every question to Competencies'.

Course Outcomes:	Num. of questions:	Marks:
Assessment Mode	Manual	
Sharing	Private	
Shuffle questions	<input type="checkbox"/>	
Stem	Single question set activity	
Instructions	Click here to Edit the Instruction...	

Points: 1

Click to select

- root
- CBC PY 1.1
- CBC PY 1.2
- CBC PY 1.3
- CBC PY 1.4
- CBC PY 1.5
- CBC PY 1.6
- CBC PY 1.7
- CBC PY 1.8
- CBC PY 1.9

Select Unit's: Select options

1. Type or Paste question text here

System allows you to map every question to Competencies

Mapping Rubrics and Level of Competency

The screenshot shows a 'Single Question' editor interface. The top navigation bar is blue with icons for home, chat, and calendar, and the user role 'Teacher' is displayed on the right. The main content area is divided into several sections:

- Course Outcomes:** Includes fields for 'Num. of questions:' and 'Marks:'.
- Sharing:** Set to 'Private'.
- Shuffle questions:** A checkbox that is currently unchecked.
- Stem:** Set to 'Single question set activity'.
- Instructions:** A link that says 'Click here to Edit the Instruction...'.
- Question Text:** A large text area containing the prompt '1. Type or Paste question text here'.
- Points:** Set to '1'.
- Course Outcome:** A dropdown menu currently showing 'Click to select' and 'root'.
- Select Unit's:** A dropdown menu showing 'Select options'.
- Select Area's:** A dropdown menu showing 'Select options'.
- Select Topic's:** A dropdown menu showing 'Select options'.
- Select Rubrics:** A dropdown menu showing 'Select options'.
- Bloom's Category:** A dropdown menu with the following options:
 - Check all
 - K - Knows
 - KH - Knows How
 - SH - Shows How
 - Perform

At the bottom right of the editor, there are '[View]' and '[Save]' buttons.

System allows you to map every question to Rubrics and level of Competencies

Competency based Scenarios for MCQ designs

Competency: Medical Knowledge/Scientific Concepts: Applying Foundational Science Concepts Content Area: Cardiovascular System

- A 55-year-old man has had crushing sub sternal chest pain on exertion over the past 6 weeks. He had a myocardial infarction 2 months ago.
- He takes nitro-glycerine as needed and one aspirin daily. He has smoked two packs of cigarettes daily for 30 years.
- Examination shows normal heart sounds and no carotid or femoral bruits.
- Treatment with a β -adrenergic blocking agent is most likely to improve his symptoms due to which of the following mechanisms?
 - (A) Decreasing myocardial contractility
 - (B) Dilating the coronary arteries
 - (C) Peripheral vaso dilation
 - (D) Preventing fibrin and platelet plugs

Competency: Patient Care: Management: Pharmacotherapy
Content Area: Hematopoietic and Lymphoreticular System:
Adverse effects of drugs

- A 55-year-old woman with small cell carcinoma of the lung is admitted to the hospital to undergo chemotherapy. Six days after treatment is started, she develops a temperature of 38°C (100.4°F). Physical examination shows no other abnormalities. Laboratory studies show a leukocyte count of 100/mm³ (5% segmented neutrophils and 95% lymphocytes). Which of the following is the most appropriate pharmacotherapy to increase this patient's leukocyte count?
 - (A) Darbepoetin
 - (B) Dexamethasone
 - (C) Filgrastim
 - (D) Interferon alfa
 - (E) Interleukin-2 (IL-2)
 - (F) Leucovorin

Competency: Professionalism

Content Area: Social Sciences

- A 45-year-old man comes to the physician for HIV testing. He says that he has been having an extramarital affair with a woman for 6 months, and he hopes this affair will continue because it has made him very happy. He has no plans to tell his wife about the affair. The wife is also a patient of the physician. Physical examination shows no abnormalities, and the result of a serum HIV antibody test is negative. Which of the following is the most appropriate action by the physician?
 - (A) Alert the local public health department to the patient's activities
 - (B) Explain to the patient that one of them must tell the wife about the affair for her own safety
 - (C) Refer the patient for counselling
 - (D) Say nothing about the affair to anyone other than the patient
 - (E) Tell the patient's wife about the affair so she can make an informed decision about possibly being placed at risk in the future

Competency: Patient Care: Management - Clinical Interventions
Content Area: Female Reproductive & Breast

- A previously healthy 27-year-old nulligravid woman comes to the emergency department because of a 2-day history of moderate-to-severe pain and swelling of the left labia.
- She is sexually active and uses condoms inconsistently. Her temperature is 37.2°C (99°F), pulse is 92/min, respirations are 18/min, and blood pressure is 115/75 mm Hg.
- Pelvic examination shows a 4 x 3-cm, tender, fluctuant mass medial to the left labium majora compromising the introital opening.
- Which of the following is the most appropriate next step in management?
 - (A) Administration of intravenous metronidazole
 - (B) Administration of intravenous penicillin G
 - (C) Ultrasound-guided needle aspiration of the mass
 - (D) Incision and drainage
 - (E) Vulvectomy

Reliability as a function of sample size

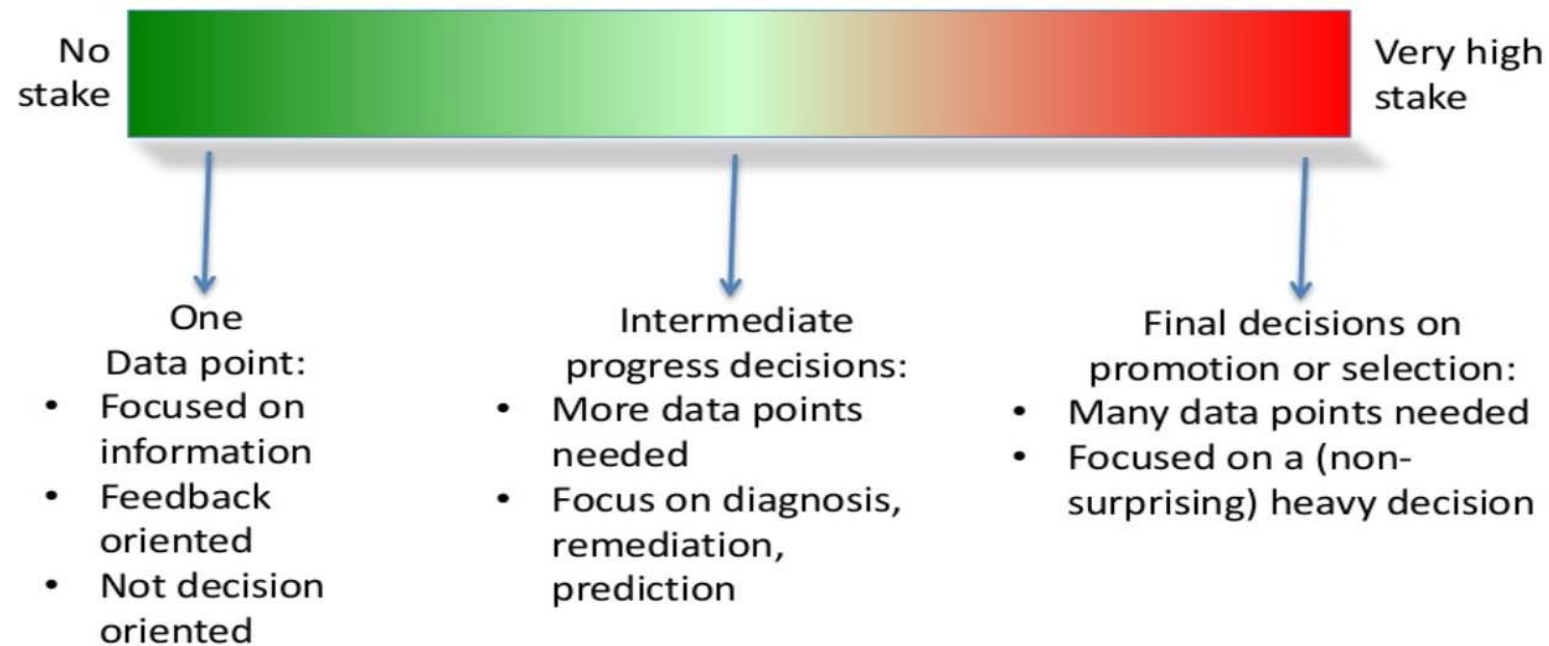

(Moonen et al., 2013)

Dynamic Real time assessment of student

Continuum of stakes, number of data point and their function

Programmatic Assessment : For

- Neutralizes the limitations of traditional assessment
- High-stakes decision is not based on the outcome of a single assessment
- Informal assessments also find a place in the final decision
- Feedback is the back bone of the entire process
- Both quantitative and qualitative feedback are given equal weight-age
- Mentor-Mentee system plays an important role in improving the student performance
- Helps Assessors to take an evidence based high-stakes decision

Programmatic Assessment : Against

- It requires extensive microplanning for the success of this form of assessment
- The performance in each of the assessments has to be compiled for each student, which is a tedious task
- Difficult to quantify for inexperienced faculty members
- Feedback can be disheartening, if not delivered constructively
- Compilation remains a difficult task
- Often it takes a back-seat and faculty members do not find time for the same
- Provided the plan for the entire academic year is well designed right at the start of the year

Programmatic Assessment

Twelve Tips for programmatic assessment

<https://www.tandfonline.com/doi/abs/10.3109/0142159X.2014.973388?journalCode=imte20>

1. Develop a master plan for assessment
2. Develop examination regulations that promote feedback orientation
3. Adopt a robust system for collecting information
4. Assure that every low-stakes assessment provides meaningful feedback for learning
5. Provide mentoring to learners
6. Ensure trustworthy decision-making
7. Organise intermediate decision-making assessments
8. Encourage and facilitate personalised remediation
9. Monitor and evaluate the learning effect of the program and adapt
10. Use the assessment process information for curriculum evaluation
11. Promote continuous interaction between the stakeholders
12. Develop a strategy for implementation

Van Der Vleuten, C. P. M., et al. (2015). "Twelve Tips for programmatic assessment." *Medical Teacher* 37(7): 641-646.

Transforming the World of Work®

Scrum Alliance® is a nonprofit organization that is guiding and inspiring individuals, leaders, and organizations with agile practices, principles, and values to help create workplaces that are joyful, prosperous, and sustainable.

[Certify Me](#)[Discover Business Agility](#)

Start your journey here

Through the certification process, you'll gain an understanding of the agile mindset and learn about Scrum roles, events, and artifacts. Start your journey here as a Certified ScrumMaster®. You'll help your team be at its best.

Scrum Education Units

What qualifies as SEUs?

Any activity that helps you develop as a Scrum or agile practitioner will be accepted. Many educational activities easily count for SEU credit.

Reading books, attending mentoring or training sessions, watching webinars, and volunteering are just a few ideas. Please review the SEU page for more examples.

How do I know which category to log it under?

If you are unsure or if it qualifies in multiple categories, please log it under the one you feel fits best.

How recent do they have to be?

For all certification renewal cycles, SEUs must have been earned within 30 months of your next renewal date.

Is there a guide to entering hours?

All hours are entered as whole numbers. Please round up as required.

For example, if you watched a webinar for 30 minutes, round up to 1 hour.

Add and manage SEUs

Add SEU(s) ?

Select an Activity Type:

Activity Description

How many hours did you spend on activity?
Whole numbers only, no decimals or fractions.

BI3.2	Describe the processes involved in digestion and assimilation of carbohydrates and storage"	KH - Knows how

Topic Outcome for PY - 2019 - Year I - CBC General Physiology

Name ↕	Description	Topic Level Outcomes (TLO)	Associated Levels of Competencies
CBC PY 1.1	Describe the structure and functions of a mammalian cell	• Topic Level Outcomes (TLO)	KH - Knows how
		CBC PY 1.1.TLO1	KH - Knows how
		CBC PY 1.1.TLO2	KH - Knows how
CBC PY 1.2	Describe and discuss the principles of homeostasis	• Topic Level Outcomes (TLO)	KH - Knows how
CBC PY 1.3	Describe inter-cellular communication	• Topic Level Outcomes (TLO)	KH - Knows how
CBC PY 1.4	Describe apoptosis – programmed cell death	• Topic Level Outcomes (TLO)	KH - Knows how
CBC PY 1.5	Describe and discuss transport mechanisms across cell membranes	• Topic Level Outcomes (TLO)	KH - Knows how
CBC PY 1.6	Describe the fluid compartments of the body, its ionic composition & measurements	• Topic Level Outcomes (TLO)	KH - Knows how
CBC PY 1.7	Describe the concept of pH & Buffer systems in the body	• Topic Level Outcomes (TLO)	KH - Knows how
CBC PY 1.8	Describe and discuss the molecular basis of resting membrane potential and action potential in excitable tissue	• Topic Level Outcomes (TLO)	KH - Knows how
CBC PY 1.9	Demonstrate the ability to describe and discuss the methods used to demonstrate the functions of the cells and its products, its communications and their applications in Clinical care and research.	• Topic Level Outcomes (TLO)	KH - Knows how

The screenshot displays the 'Competency Based Medical Education' interface. At the top, it says 'Student' with a user icon. Below this is a navigation bar with 'CG', 'CBA', 'QBs', 'LMS', and 'Help'. The main content area is titled 'Physiology' and shows a table of lessons. The table has columns for Index, Title, Enable, Edit, Delete, Dates, and Share. There are 11 lessons listed, each with a 'Disable' button and a 'Share' link. Below the table, there are links for 'Chapter List', 'Add New Lesson', and 'Shared Lessons'. At the bottom, there is a section for 'Create Lessons in Bulk' with a brief instruction.

Student's Dashboard of a Course

The dashboard features a blue header with navigation icons (back, messages, calendar) and a 'Student' dropdown menu. Below the header are five summary cards: 'Assignments Due' (0), 'Assignments Graded...' (13), 'Announcements From...' (0), 'Upcoming Class Events' (29), and 'Responses to my...' (0). A 'More Capture Types' button is located to the right of these cards. Below the cards is a navigation bar with tabs for 'Assignments Due', 'Graded Assignments', 'Latest Announcements', 'Upcoming events', and 'My Discussions'. The 'Graded Assignments' tab is active, displaying a table of assignments.
